Designed by Sharon Kikoza

Once I have started with my project regarding the knife I refer as do the best from designing and usage point of view. The most important thing was to shape the knife handle by ergonomic form. I gave attention also to the securing of the product, thus I have formulated special finger guard by usage of this technique. Since I have been working in this field for many years, therefore I have designed a unique etched form on the handle.

As we all know the Kitchen is an important part of our home, in which all the family gather together therefore it was important for me to create such a product, which is not only practical but also will catch the eye. After finishing my work I have entered the engineering field and now

KIND REGARDS
